EXPERIENCES

Mobile developer at Essential

- Worked as a single handed mobile developer at Essential and build a fullstack mobile locomotion application named Eride with the ability to book rides and be a Driver as well. I worked on all the backend, frontend functionalities and pages, with security and user authentication. Video available on my portfolio.

Web developer at Alpha Development.

- Worked as a web developer at alpha development, single handedly built different landing pages under 12 hours like Libra-finace.com, Moot crypto website (Yet to be launched), libra-miner, and many more blockchain related webpages.

Lead fullstack developer in School

- Led a team of 3 developers in school to build a social media application names Flickshot, https://flickshot-final.vercel.app (available in portfolio), used for sharinf videos just like a tiktok clone. They worked on the upload frontend while I built every other part of the application including the frontend and the backend.

Experience with E-commerce sites

- Built e-commerce websites for clients in the past as a freelancer, c-luxes.org, and worked on 2 others that are not for disclosure, also worked on an amazon frontend clone (still ongoing) https://ali3n-express.netlify.app. I was also abile to improve the website performance by tracking the number of users that visit the page, and any performance issue they have or bugs they might experience, being able to track them and see the way the bugs and errors occured to these sites

Apple iPhone 15 website

- Built Apple iPhone 15 website using React, GSAP and Three Js, with all the 3D model and live animation of models and videos. And I was also abile to improve the website performance by tracking the number of users that visit the page, and any performance issue they have or bugs they might experience, being able to track them and see the way the bugs and errors occured

Freelance Frontend Development

- Developed and maintained visually appealing user interfaces for high-traffic websites. Implemented responsive designs, resulting in a significant decrease in bounce rates.

Freelance Fullstack Development

- Led frontend development and collaborated with backend teams to crrate dynamic web applications. Successfully integrated APIs to enhanced functionality and improve user experances in teams.

Freelance Team Lead

- Supervised ateam of developers in my team fostering professional growth and delivering projects on time and within budget.
